

ITEM - OVERLAY TAPER AT RAMPS

The full thickness of the overlay shall be carried onto the On and Off ramp tapers to a point at/or beyond the Gore Nose of the ramp. The thickness of the overlay shall be tapered to meet the grade of the existing bituminous pavement on the ramps. The length of the taper section and the end of the full overlay thickness will be as shown on the project plans.

DESIGNER:

Use this Item for divided roadways when the overlay is to be tapered at the ramps.
