

ITEM - ASPHALTIC CONCRETE FRICTION COURSE (MISC.)

The asphaltic concrete friction course shall be as specified in Section 411 of the Standard Specifications, and Contracts and Specifications Stored Spec. "411ACFMS".

Quantities are estimated on a spread rate of lbs per square yard which includes % for leveling to provide a minimum inch thickness.

The asphalt cement type shall be PG *

The estimated haul distance for the ACFC is ** miles.

The average elevation of the roadway for this project is feet.

DESIGNER:

This Item is generally used when the ACFC quantity is less than 500 tons.

Application	Spread Rate	% For Leveling
1. New Pavement Section AC/ACFC or Overlay/ACFC	59	25
2. ACFC Only	59-70	25-50

Amount of leveling and spread rate vary based on degree of distortion and irregularities in the asphalt concrete surface.

* To be supplied by the Bituminous Engineer.

** To be supplied by Geotechnical Services.

The quantities shown above are based on 125#/cu. ft. and a 1/2 inch thickness at 47 lbs/sq. yd.
