

(A) ITEM - DISPOSAL OF EXISTING ASPHALTIC CONCRETE

Upon removal, the existing asphaltic concrete material not approved by the Engineer for use on the project, shall become the property of the Arizona Department of Transportation. It shall be hauled, by the contractor, to the ADOT disposal site located at __, an approximate haul distance of __ miles. The material shall be placed in the area designated for stockpiling asphaltic concrete as specified and directed by the Engineer.

The contractor shall provide at the disposal site equipment capable of handling and placing the salvaged material in stockpiles as directed by and to the satisfaction of the Engineer.

No measurement or direct payment will be made for the hauling and stockpiling of the salvaged material.

(B) ITEM - DISPOSAL OF EXISTING ASPHALTIC CONCRETE

Upon removal, disposal of the existing asphaltic concrete shall be the responsibility of the contractor.
