ONE-DIRECTION FLEXIBLE DELINEATORS

POST NOTES:

1. Minimum wall thickness shall be 1/8 inch.
2. Surface color is as specified in the delineator type table.
3. Delineators shall meet all provisions of the Standard Specifications and the project plans.
4. Where surface mounting is required, insertable base and surface-mounted foundation unit may use a "teating" receptacle shape.
5. Upper end of base transition units shall fit the post contour sufficiently to attach firmly to the post using bolts, pins or rivets.
6. Lower end of base transition segments and base transition units shall be shaped and sized to snugly fit the foundation unit. It shall be perforated to attach firmly to the foundation unit using bolts or pins.
