ARIZONA HIGHWAY USER REVENUE FUND

OFFICIAL FORECAST UPDATE

RISK ANALYSIS OF EXPECTED VALUES

Introduction

This document presents the forecast of expected values for the Arizona Highway User Revenue Fund for the period FY 2011-2020, as prepared by the Arizona Department of Transportation.

Background

The State of Arizona taxes motor fuels and collects a variety of fees relating to the registration and operation of motor vehicles in the state. These collections include gasoline and use fuel taxes, motor carrier fees, vehicle license taxes, motor vehicle registration fees, and other miscellaneous fees. These revenues are deposited in the Arizona Highway User Revenue Fund (HURF) and are then distributed to the cities, towns and counties of the State and to the State Highway Fund, which is administered by the Department. These taxes and fees represent the primary source of revenues available to the state for highway construction, improvements and other related expenses.

Since 1986, the Department has estimated Highway Revenues using a comprehensive regression-based econometric model. In 1989, the model was updated by Dr. Alberta Charney of the University of Arizona. The model relied on the estimates of certain “independent variables” to predict future tax revenues. Any variability between estimated and actual values could lead to variances in the tax forecast. In order to deal with this variability, the Department introduced the Risk Analysis Process (RAP) in 1992. The RAP relies upon probability analysis and the independent evaluation of the model’s variables by an expert panel of economists. This results in a series of forecasts with specified probabilities of occurrence, rather than a single or “best guess” estimate.

In 1997, Hickling Lewis Brod Inc. (HLB), working in conjunction with Dr. Dennis Hoffman of Arizona State University, developed a new forecasting model to incorporate certain economic data generated over the past ten years and evaluate the inclusion of independent variables absent from the 1989 model, to enhance the model’s forecasting accuracy. The new model also took into consideration 1997 legislation which eliminated the weight distance tax on motor carriers, increased weight and use fees for use class vehicles, and changed the point of taxation on fuel.

In September 2000 and 2003, HLB reviewed the model and updated the equations. The independent variables contained in the model in 2003 included Arizona Real Income Growth Per Capita, Population Growth, Wage & Salary Employment Growth and Fleet Fuel Efficiency.

In 2005, HDR\HLB developed a new forecasting model to incorporate additional economic data that would enhance the model’s forecasting accuracy. The Arizona Real Gross Domestic Product Growth independent variable was added to the model to incorporate the impact of the Arizona economy on the commercial registration activities.

In September 2008, HDR\HLB reviewed the forecasting model and added the Arizona Real Gas Price Growth independent variable to improve the model’s forecasting accuracy for changes in Arizona gasoline consumption. In September 2009, HDR\HLB reviewed the forecasting model and added the West Coast No. 2 Real Diesel Price Growth independent variable to improve the model’s forecasting accuracy for changes in Arizona use fuel (diesel) consumption. The updated model now includes:

- Arizona real income growth per capita
- Arizona population
- Arizona non-farm employment
- Arizona real gross domestic product
- Arizona fleet fuel efficiency (Not part of RAP Process)
- Arizona real gas price growth
- West Coast No. 2 real diesel price growth

Risk Analysis Panel

The Risk Analysis Process relies heavily on the judgments of an expert panel of economic and financial participants to provide information critical to the forecasting process. In August 2010, a panel of fifteen economic and finance experts representing public, private, and academic sectors submitted their individual estimates of the model's independent variables and comments on the future economic outlook. The information gathered from the panelists was input into the model to produce a series of forecasts with associated probabilities of occurrence. The panelists' inputs are reflected in the attached tables at the back of this report.

Model Results

This year's panel inputs produced a mean forecast of \$14,373.4 million for the period FY 2011-2020 with a compound growth rate of 3.8 percent.

The Department's Official Forecast for FY 2011-2020 totals \$13,861.5 million with a compound growth rate of 3.4 percent. The Official Forecast incorporates the 50 percent confidence interval for FY 2012-2020. The FY 2011 forecast of \$1,205.5 million was developed in July 2010 by ADOT staff using time-series techniques, historical and projected growth rates from the model, and recent legislative changes.

FY 2011 Official Forecast (Dollars in Millions)			
Fiscal Year	Mean Forecast	Official Forecast	Confidence Level
2011	\$1,219.1	\$1,205.5	N/A
2012	1,252.2	1,220.7	50%

Ave. CGR	3.9%	3.4%	

Summary

The Department's Official Forecast for FY 2011-2020 totals \$13,861.5 million, a decrease of \$1,129.6 million from the September 2009 Official Forecast. The Risk Analysis Process panel members overall forecasted lower growth for all the independent variables through FY 2015 when compared to their September 2009 inputs. The panel for three years in a row has voiced concern over the Arizona economy due mainly to the uncertainty in the real estate market, negative job growth and slower population growth in the first few years of the forecast period. The panel does not expect Arizona to return to normal growth patterns until FY 2015 and those growth rates will be lower than their estimates during the FY 2003-2007 real estate bubble in Arizona.

Supplementary Information

The remaining pages of this report present supplementary information on the detailed results of the Risk Analysis Process, the Department's model and the values of the independent variables forecast by the expert panel. While the Official Forecast period is FY 2011-2020, panel inputs were requested for FY 2011-2016, 2021 and 2026. Data displayed for other than the requested years, has been extrapolated.

NOTES:

FY 2011 HURF estimate based on July 2010 Forecast.

FY 2012-2020 HURF estimate based on October 2010 Official Forecast.

/1. The DPS/ESP includes \$1 million for Economic Strength Project (ESP) each year.

The DPS transfer in FY 2011 is \$78.6 million per Laws 2010, 7th Special Session, Chapter 1, (HB 2001) and \$10 million each year thereafter, which is subject to change.

FY 2011 includes a \$620,400 appropriation to MVD for the registration compliance program per Laws 2010, 7th Special Session, Chapter 1 (HB 2001).

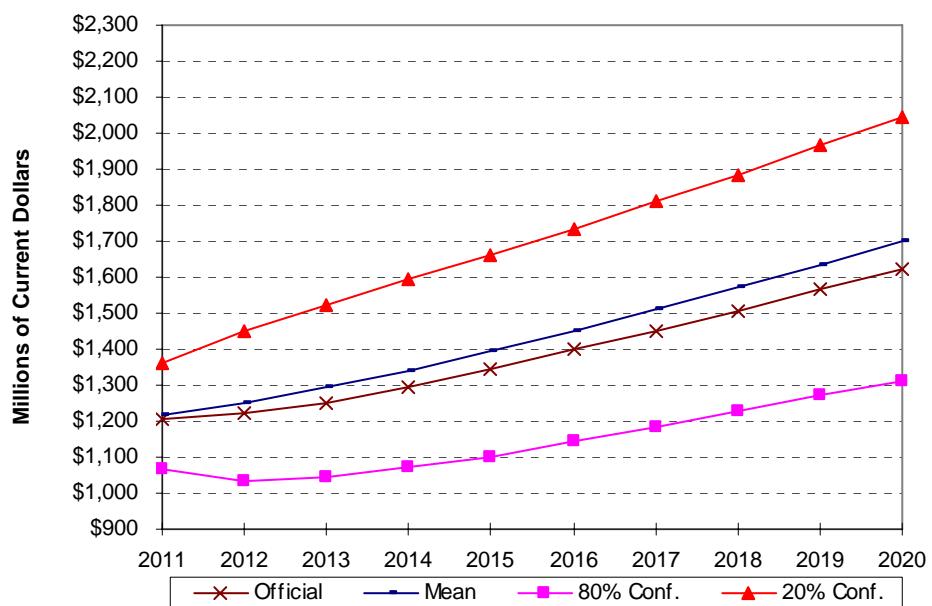

/2. Per Laws 2005, Chapter 306 (SB 1119), 1.51 percent of the state highway fund share of HURF VLT is transferred to the DPS Parity Compensation Fund.

/3 Net of the DPS Parity Compensation Fund. FY 2011 net of a \$43.6 million transfer from the state highway fund share of HURF VLT to the state general fund per Laws 2010, 7th Special Session, Chapter 1 (HB 2001).
