**From:** Julie E. Kliever, Acting Assistant State Engineer, Construction

**Subject:** Review and Approval  
of Payments for Asphalt

## Review and Approval of Payments for Asphalt

### **Purpose**

To process all Asphaltic Concrete materials payments, including adjustments, in a consistent manner statewide.

### **Background**

Industry and ADOT senior management have discussed the status quo and concluded that improvements could be attained by ensuring the consistent application statewide of payments for asphaltic concrete materials.

### **Process**

Effective immediately, the Assistant State Engineer for Construction must review and approve all payment arrangements prior to processing in situations where the contractor is seeking adjustments to payments for asphaltic concrete materials - such as mix, binder, mineral admixture, waste and RAP. This also includes instances when commercial plants are encountered and binder is based on ignition furnace results, in lieu of invoices and tank stabs.

The policy applies to all projects that have not been finalized and approved by the Assistant State Engineer for Construction.
