

# SLOW DOWN IN WORK ZONES

## Driving Through Work Zones

- ▶ Expect the unexpected.
- ▶ Slow down!
- ▶ Keep a safe distance.
- ▶ Pay attention.
- ▶ Obey road crew flaggers.
- ▶ Stay alert and minimize distractions.
- ▶ Keep up with traffic flow.
- ▶ Check road conditions before traveling.
- ▶ Be patient and stay calm.

Work-zone safety is important not only to protect those who build and maintain our highways, but also to protect motorists. About 80 percent of those killed in work-zone crashes are drivers and their passengers.

Preventable rear-end collisions are the most common type of work-zone crash. Simple things such as slowing down, obeying signs and flaggers, and preparing for lane restrictions go a long way to keep everyone safe.
