

## 3D Engineered Models

Thinking about switching from 2D plan sets to 3D engineered models in your highway and bridge construction projects? A new FHWA web page can help you get started:

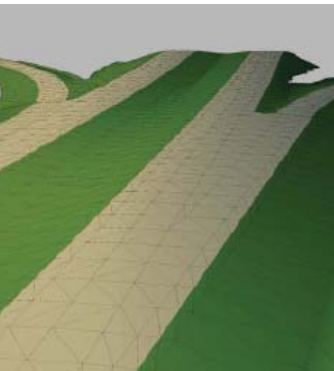

[www.fhwa.dot.gov/3D/](http://www.fhwa.dot.gov/3D/)

with a link to the FHWA's

Technical Support Services Center

(Search "fhwa 3D")

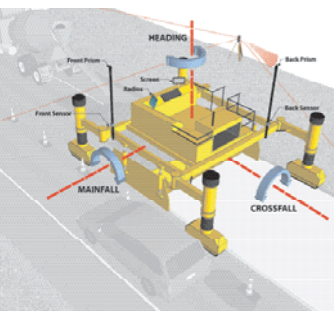

This web page is your one-stop resource for information about 3D engineered models in highway design and construction. Click on the link to the TSSC for fast, personal responses to specific questions.

3D engineered models

Website and TSSC launch: January 2014

Note: Web-based training modules  
coming: August 2014
