

Intermodal Transportation

**MEMORANDUM**

TO: Annette Riley, Manager, Project Management Group

FROM: Dallas Hammit, Deputy Director for Transportation/State Engineer

Handwritten initials 'DA' in blue ink.

CC: Steve Boschen, Intermodel Transportation Division,

DATE: September 21, 2015

RE: Excellence in Advancing Sustainable Project Development (EASPD) Award  
Phoenix - Globe Highway (US 60) Silver King Section & Superior Streets Project 060 PN 222  
H7900 01C

---

Congratulations!

Through the Arizona Department of Transportation's (ADOT) Intermodal Transportation Division Sustainable Transportation Program, the State Engineer's Office approved the introduction of an award process for sustainable project implementation to advance exemplary efforts within ADOT's design, development, and maintenance areas.

The EASPD Award Committee considers three components: the project's Federal Highway Administration (FHWA) Infrastructure Voluntary Evaluation Sustainability Tool (INVEST) score, contributing best management practices, and stakeholder collaborative efforts. The award committee noted four areas of high achievement:

- Context Sensitive Project Development
- Highway and Traffic Safety
- Historical, Archaeological, and Cultural Preservation
- Earthwork Design - Best Management Practices

I wanted to extend my gratitude for the project efforts that went above and beyond as is recognized through this award. In addition, this project was featured in ADOT's nationally released Sustainable Transportation Implementation Report. As only the second award recipient we anticipate this will set the groundwork for other areas of ADOT project development to go above and beyond and continue the quality work the new sustainable transportation program represents.
