Defer Project to FY20.

26. JUSTIFICATION OF REQUEST

The Environmental Clearance has not been issued due to the lack of a Biology opinion by the USFWS. It is anticipated that USFWS will provide their opinion by early March. Upon receipt of the Biology opinion, the 404/401 Individual Permit can be completed and submitted to the US Army Corps of Engineers. Environmental Clearance is anticipated by the end of March. Right-of-way acquisition will need to be requested, authorized and acquired after Environmental Clearance is obtained. This project will need to be deferred to Fiscal Year 2020 since there will be insufficient time to acquire the Right-of-Way subsequent to obtaining the Environmental Clearance and to advertise the project for construction in this Fiscal Year. Bridge is STR #416.

The design of this project will include 2 full bridge replacements (Agua Sal Bridge - North and the Lukachukai Wash Bridge) and 1 partial deck replacement (Agua Sal Bridge - South).

Geotechnical Investigation: The geotechnical investigation and design elements that could be shared to reduce costs were much less than originally estimated. Also, the mobilization of the geotechnical equipment was not included in the original estimate.

Bridge Design & Phased Construction: For these elements, the original estimate assumed there would be a moderate cost savings by combining the 2 bridge replacements into 1 design. However, it was determined that minimal design elements can be shared between the 2 bridge replacements since they have different number of spans and span lengths.

Change Type of Work to "Replace Bridge".

26. JUSTIFICATION OF REQUEST

This project requests upgrading all TS-1 signal cabinets with TS-2, Type 1 signal cabinets along SR 90 and SR 92. This will include adding conductors and any detection, preemption or loops that need to be rewired along the same corridor. This work is necessary since the cabinets currently installed at each location are outdated equipment; they are all 10 to 15 years old and require replacement for optimal functionality with the new communication equipment that has been recently installed. When these older cabinets are knocked down, replacing them with the same type, TS-1, requires more than eight hours for the signal techs to rewire to ensure functionality. With the requested TS-2 replacement cabinets, no wiring is needed, as all programming is done through the controller, allowing the technician to make adjustments more efficiently.

This project involves using a contractor to remove the existing TS-1 signal cabinets and replace with TS-2, Type I signal cabinets at 14 intersections along SR 90 and SR 92. The contractor will use signal cabinets provided by ADOT and purchased with this project budget.

Increase in Budget, Change project name

26. JUSTIFICATION OF REQUEST

During Final Design, the design team recommended adding the following work: Sidewalk Ramps, Pedestrian Push Buttons, Traffic Signal Relocation, and Silica Fume Concrete Mix. These items increased the construction cost by \$1.3M. The project team proposed constructing a pathway on McConnell Drive to connect existing sidewalk on the project with a future pathway that NAU will construct on campus. This will make the Flagstaff Urban Trail System continuous. The construction costs are estimated at \$550K.

Quantities and unit prices were underestimated in scoping for the following items or groups of items: Traffic Control, Removals, Concrete Barrier, Guardrail, Structural Backfill, and Asphalt. The cost increases associated with these underestimations are \$350K.

This request includes ICAP.

Change name to "SR 89A SPUR OP".

25. DESCRIPTION OF REQUEST

Increase design budget

26. JUSTIFICATION OF REQUEST

ADOT originally established a \$500k project to design the rehabilitation of the Butler Ave and 4th Street bridges. ADOT spent \$130k on the initial design effort and then was approached by the City of Flagstaff to consider widening and replacing the 4th Street Bridge. City of Flagstaff paid \$60k to re-scope the Fourth St Bridge work from a rehabilitate bridge project to a replace bridge project. A Joint Project Agreement between the City and ADOT was subsequently agreed upon, with each agency contributing \$500k to the design of a 4th Street bridge replacement/widening project. Prior to Flagstaff's request, \$130k was spent on the initial design effort to rehab the bridge. This request is to replace the \$130k and make ADOT's \$500k contribution whole as well as to fully fund the Butler Ave. Bridge Rehabilitation development costs. Change Type of Work to "Replace Bridges".

The breakdown of requested funding is as follows:

\$165k Consultant
