Subject: Tagging/Stamping on Accepted Sectional Corners

This is a reminder that pursuant to section 8B of the Arizona Boundary Survey Minimum Standards (ABSMS) adopted earlier this year, if you find a monument at a sectional corner that is "plain" and has no identifying information or record of who set it, you must affix your registration number to that monument, and note this in the description of that corner on the survey drawing and R/W plans that you are doing for us.
