

Contractor-Furnished Material Sources

Overview of the Application Process

Contractor-Furnished Material Sources must go through a multiple-step process in order to obtain environmental clearance for use on ADOT projects. First, the material source owner or operator must submit an initial Material Source Environmental Analysis Application, with cultural survey and reports, to the Environmental Planning Group. Upon receipt of a completed application, the Environmental Planning Group will initiate a cultural consultation process. When this process is successfully completed, the material source will receive a tracking number and may be included on the list at the bottom of this page. For any use of the material source thereafter, an Environmental Analysis Update must be completed and submitted to the project Resident Engineer for approval.

Please note that any changes to the location of a material source or haul road, or expansion of boundaries will require additional cultural consultation. In some cases, the contractor's proposed activities may differ than those approved previously and may require additional review and approval. Additionally, changes in ownership require that a new application be completed. Please contact the Environmental Planning Group for more information.

Environmental Planning Group Contact Information

The initial Environmental Analysis for a Contractor-Furnished Material Source is handled by the Environmental Planning Group. Please note that the review and cultural consultation process takes 45 days from the receipt of a complete application. Submit initial applications, ownership changes, and any revisions to site use or boundaries to:

Ed Green
Environmental Planning Group
Arizona Department of Transportation
