

Permits

Each ADOT district office has a permits services section that issues permits and provides regulatory enforcement and administrative guidance on a variety of highway related permits. Permits issued include outdoor advertising, film, oversize loads, junkyard, encroachment, special event, and Adopt-A-Highway. A manual on permits, guidelines, and procedures is available online. The permits services section also maintains the statewide historical permits file. These permits are issued by the appropriate permits office with construction and maintenance personnel assisting in the inspection and identification of illegal permits. Permit applications to use ADOT right-of-way are also available at <http://azdot.gov/business/Permits>
