Subject: IRP/IFTA Replacement System

Dear Motor Carrier:

I am writing to inform you of some exciting developments. The Department is working on a new and improved processing system that will integrate service across the interstate vehicle registration (IRP) and interstate fuel tax (IFTA) programs. We anticipate a rollout date of April 9, 2016 for the IRP portion of the system. The IFTA portion will be rolled out on July 1, 2016 for the second quarter reporting period.

This single system will merge IRP and IFTA, and integrate with State payment and accounting systems, data clearinghouses, and Federal systems. Our primary focus is to deliver an efficient, user friendly system in order to provide faster and more compliant services to you. Key features and benefits of our new approach include:

- More online functionality, including an advanced “dashboard” approach that will help you manage your compliance status and tasks.
- Better and faster integration with Federal systems, thereby reducing data inconsistencies and helping to avoid delays when traveling outside of Arizona.
- More seamless integration, speeding the processes of titling and registering new vehicles.
- Moving to a new and secure online payment system.
- Linking existing MVD, IRP, and IFTA accounts under a single customer view. All current account numbers will remain the same.

A secondary feature of the system rollout, scheduled over the first quarter of implementation, will allow online processing and payment of IRP and IFTA services. In order to prepare for using the online services, please keep in mind:

- You will need no specialized technology.
- You will need access to a good internet connection.
- While each user can adjust Internet browser settings to enhance or disturb compatibility, the system is tested to be compliant with Google Chrome, Internet Explorer® 10/11/Edge, Firefox, and Safari.
- You will be able to print IRP cab cards and IFTA licenses; therefore, access to a laser printer is recommended.

Our team is extremely appreciative for your support throughout this exciting project. Please be aware that some issues may arise, as they often do when a new system is implemented. Your patience and willingness to work with us will be greatly appreciated.
