

Interstate 10 Houghton Road Traffic Interchange Improvements *Design Features*

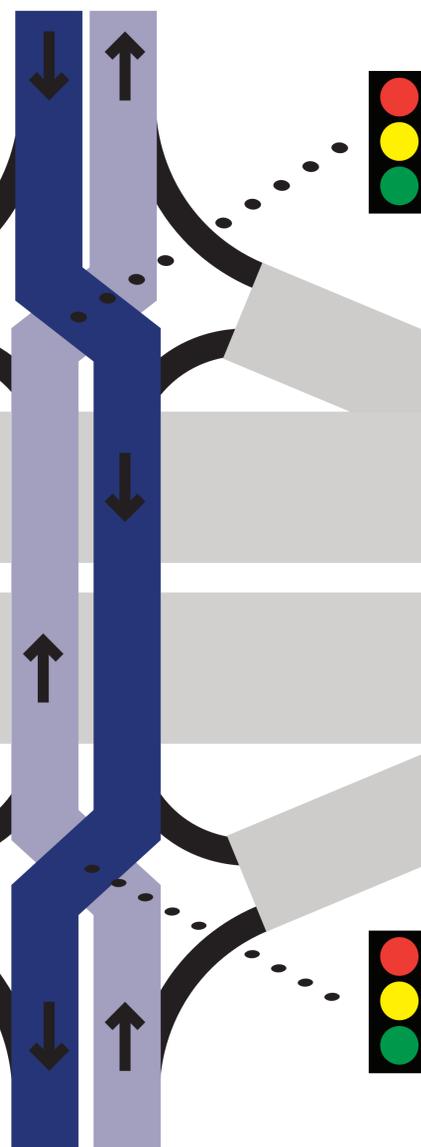

DIVERGING DIAMOND INTERCHANGE (DDI) BENEFITS

- Improves traffic efficiency
- Fewer traffic conflict points
- Free-flowing right and left turns onto highway ramps
- Reduces the chance of drivers entering ramps in the wrong direction
- Accommodates future widening
- No retaining walls are currently needed

OTHER DESIGN FEATURES

- 3 through lanes in each direction
- Sidewalks to accommodate pedestrians
- Includes wide shoulder for bicycles

Map not to scale
