

ADOT wants YOU to be an SSP! (Super Safe Pedestrian)

Help **Super Safe Pedestrian Pete** get to school safely! Draw the route he should walk and follow the rules!

1 Walk on a sidewalk whenever possible. If there is no sidewalk, walk facing the traffic on the left side of the road.

2 Be alert, removing any headphones or putting devices like phones down while crossing a street.

3 Make eye contact and wave to drivers before stepping out. At a four-way intersection, also look behind and in front.

4 Cross at corners, using crosswalks and traffic signals whenever possible. Wait for the signal to cross, but still watch out for cars.

5 Before crossing a street, stop, look left, right and then left again to make sure it is safe to cross.

6 Walk, don't run, across the street.

Always listen to your school's crossing guard - if one is present.

Thanks to the Active Transportation Alliance for these safe pedestrian rules
