

# I-10/Koli Road Traffic Interchange Study

The Arizona Department of Transportation (ADOT), as the lead agency and project sponsor, in collaboration with the Gila River Indian (Community), the Bureau of Indian Affairs (BIA), and the Maricopa Association of Governments (MAG), has initiated a Design Concept Report (DCR) and an environmental study (Environmental Assessment or EA) for the proposed Interstate 10 (I-10)/Koli Road Traffic Interchange. The proposed I-10/Koli Road Traffic Interchange would be located on I-10 between the existing Wild Horse Pass Boulevard/Sundust Road and State Route 347/Queen Creek Road traffic interchanges.

Public scoping is the first step of the National Environmental Policy Act (NEPA) environmental study process. The public scoping and alternatives process provides the opportunity for the Community to educate the study team about the I-10/Koli Road Traffic Interchange study area, as well as share concerns about modifying I-10 to incorporate a traffic interchange at approximately Koli Road. The public scoping and alternatives will:

- **Provide an overview of the I-10/Koli Road Traffic Interchange study area, the study's objectives, and the study's schedule**
- **Obtain feedback on opportunities, issues, and concerns related to the study area**
- **Solicit input on potential study area improvement alternatives**

This input will help ADOT, the Community, and MAG select a Preferred Alternative for this section of I-10 and Koli Road.

Key: EA - Environmental Assessment | DCR - Design Concept Report
