**MISSION** We provide highway infrastructure and transportation services

**VISION** To safely connect people and empower our economy

**VALUES** Easy to work with, collaborative, results focused

## TRAFFIC INCIDENT MANAGEMENT:

**QUICK CLEARANCE**

**FENDER BENDER?**  
If you're in a minor or non-injury crash and your vehicle is operable, move it out of travel lanes.

**Why move your vehicle out of travel lanes?**

- Driver Safety
- Traveler Safety
- Responder Safety
- It's the Law! A.R.S. 28-674

**M**ove your vehicle to the side of the road and inspect it there — not in dangerous travel lanes.

**O**ften, a primary crash leads to a traffic backup and increases the risk of a secondary crash, which can be more severe than the original collision.

**V**ehicles involved in a non-injury crash that remain operable, according to Arizona law, must be removed from the roadway.

**E**mergency responders — police, fire, tow truck operators, etc. — need a safe place to work, too. On average, a tow truck operator is struck and killed every six days in the U.S.

**KEEP IT GRAND**
