Bridge Ratings

 **Good** - Primary structural components have no problems or only very minor deterioration.

 **Fair** - Primary structural components are sound but have some concrete deterioration or erosion around piers or abutments caused by flowing water (scour).

 **Poor** - Advanced concrete deterioration, scour or seriously affected primary structural components. A poor condition bridge is not unsafe. Unsafe bridges are closed.

Pavement Ratings

 **Good** - Smooth road surface, with little cracking and no ruts or potholes.

 **Fair** - Moderate amounts of cracking that lead to increased roughness of the road surface. Shallow ruts in the wheel path.

 **Poor** - Numerous cracks, rough road surface, ruts in the wheel path, potholes and disintegration of the road surface.
