The ADOT Map Book

Introduction

The Arizona Department of Transportation (ADOT) Map Book samples the numerous uses made of ADOT's base centerline file, commonly known as Arizona Transportation Information System (ATIS) Roads. ATIS Roads is a Geographic Information System (GIS) feature class, or layer, representing Arizona's roads and streets. It is maintained by the ADOT Multimodal Planning Division's GIS for Transportation (GIS-T) Team.

GIS has gained strength throughout ADOT for its usefulness as a software tool in planning, analyzing, modeling, and managing spatial information. Maps produced from GIS databases provide a visual array of information, enabling the user to easily understand otherwise complex environmental, economic, and social issues. GIS is more than just printed maps, its power lies in the databases that it is built from which enable the user to query by spatial location.

GIS has been used at ADOT for many years. One often hears the "ATIS Standard" quoted as a source for location reference of highway projects and Agency assets. The GIS-T Team continually creates and maintains GIS databases and obtains databases from other sources. These sources may include Local, State, and Federal agencies and the Private Sector. These databases are then used as overlays in ATIS Roads, converting a static representation of the roads and streets into a dynamic GIS application. The maps in this edition of the Map Book represent those maps that are most often requested and used within ADOT.

Lastly, data sharing is at the heart of GIS technology's effectiveness. The GIS community in Arizona is a diverse group with a strong commitment to cooperative data sharing and without this cooperative effort, many of the maps presented here could not have been produced.

A wide-angle photograph of a desert town under a blue sky with scattered white clouds. In the foreground, a concrete bridge spans a dry, sandy area with sparse green shrubs. Behind the bridge, a multi-lane road curves through a town with various buildings, including some with flat roofs and others with more complex structures. In the background, a range of brown, rocky mountains stretches across the horizon. The overall scene is bright and clear, suggesting a sunny day.
