### ACQUISITION FROM SUBJECT PROPERTY:

Area: 6,090/sf x \$0.50/sf = \$3,045 SAY \$3,000

     Photograph of property attached for value \$25,000 - \$50,000 Type of Interest:                     

Highest and best use:   x   unchanged      changed (see comments)                                     

**COMMENTS:** (re: access, shape, location, topography, intensity of use for partial interests, minor improvements/cost-to-cure, etc.)  
Sale 1 was needed for an assemblage (helping size and solving a shape problem) for an existing business. Sale 2 has good future potential for legal access, and size/shape for residential development at that time. Sale 3 is a currently buildable lot with good access being used for equipment storage. The subject has access by an alley, with no foreseeable potential for proper street access and is not buildable as is.

**PROPOSED MINIMUM: \$3,000**
