STATE OF ARIZONA

The ADOT Map Book

Introduction

The Arizona Department of Transportation (ADOT) Map Book samples the numerous uses made of ADOT's base centerline file, commonly known as Arizona Transportation Information System (ATIS) Roads. ATIS Roads is a Geographic Information System (GIS) feature class, or layer, representing Arizona's roads and streets. It is maintained by the ADOT Multimodal Planning Division's GIS for Transportation (GIS-T) Team. GIS has gained strength throughout ADOT for its usefulness as a software tool in planning, analyzing, modeling, and managing spatial information. Maps produced from GIS databases provide a visual array of information, enabling the user to easily understand otherwise complex environmental, economic, and social issues. GIS is more than just printed maps, its power lies in the databases that it is built from which enable the user to query by spatial location.

GIS has been used at ADOT for many years. One often hears the "ATIS Standard" quoted as a source for location reference of highway projects and Agency assets. The GIS-T Team continually creates and maintains GIS databases and obtains databases from other sources. These sources may include Local, State, and Federal agencies and the Private Sector. These databases are then used as overlays in ATIS Roads, converting a static representation of the roads and streets into a dynamic GIS application. The maps in this edition of the Map Book represent those maps that are most often requested and used within ADOT.

Lastly, data sharing is at the heart of GIS technology's effectiveness. The GIS community in Arizona is a diverse group with a strong commitment to cooperative data sharing and without this cooperative effort, many of the maps presented here could not have been produced.

An aerial photograph of a multi-lane highway in a desert landscape. The highway has several lanes in each direction, with a median strip. A bridge crosses the highway in the middle ground. In the foreground, there are green highway signs for Exit 101 A-B and Exit 99. The background shows a city skyline and mountains under a clear sky.

A large yellow construction machine, possibly a paver or grader, is working on a road surface. Several workers in high-visibility vests and hard hats are visible around the machine. The background shows a dry, hilly landscape with some buildings and mountains in the distance. The text is overlaid on the image.
