

State Route 347 Improvement Project Interstate 10 to the City of Maricopa

Overview

The SR 347 Improvement Project will improve a 14-mile section of SR 347 between I-10 and the City of Maricopa. This project corridor runs through Maricopa and Pinal counties and is primarily located within the Gila River Indian Community.

Once complete, the SR 347 Improvement Project will provide added capacity, help alleviate congestion, and improve safety and traffic flow along this busy stretch of roadway that drivers depend on every day.

Project Elements

The planned improvements include:

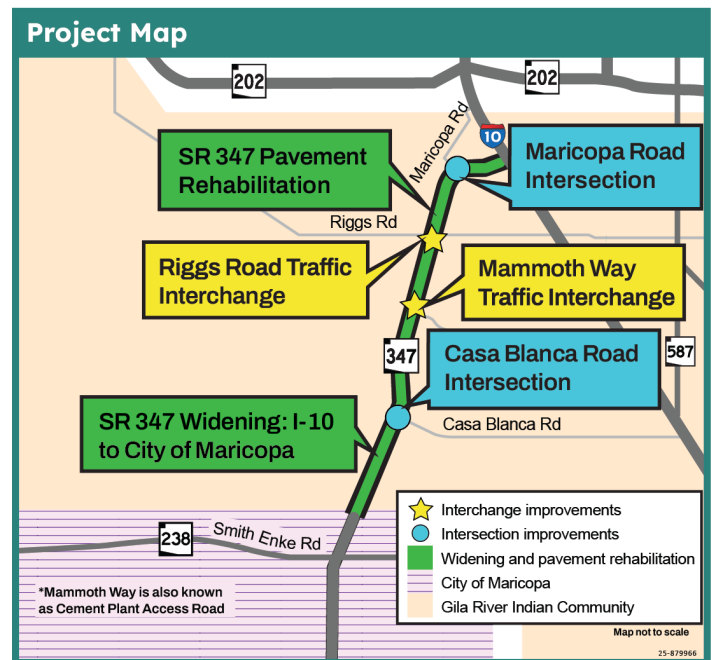

- ➔ Adding a new third lane in each direction from I-10 to the City of Maricopa and constructing concrete median barrier to physically separate the directions of travel
- ➔ Rehabilitating the existing pavement along that same 14-mile stretch of roadway
- ➔ Constructing new grade-separated interchanges at Riggs Road and Mammoth Way
- ➔ Adding turn lanes, acceleration and deceleration lanes, and signal improvements at Casa Blanca Road and Maricopa Road

Project Schedule

The first phase of this three-and-a-half-year project will begin in late June 2026 and focus on rehabilitation and repaving the existing travel lanes and shoulders along SR 347 between I-10 and the City of Maricopa.

This work will provide a smoother, more comfortable driving surface for motorists while preparing the roadway for widening and interchange construction, which is expected to begin this winter.
