Arizona Department of Transportation  
Project: Laguna Creek Bridge Scour Remediation

**Congratulations! Your project (Laguna Creek Bridge Scour Remediation) has been selected as a recipient of the 2019 Sustainable Infrastructure Award from Arizona State University's Metis Center.**

Thank you for your nomination package submission. After careful review by the Metis Center leadership team, we are happy to have selected your organization as a recipient of the award. We received a large number of nominations, and the competition was strong. The projects that were selected represent an impressive array of innovative sustainable infrastructure practices being deployed by public and private agencies across the Phoenix metro region.

Your project and organization will be featured on the Metis Center webpage ([metis.asu.edu/awards](http://metis.asu.edu/awards)) and a press release by ASU will soon be issued (we will notify you). Furthermore, we will later this summer send you a trophy for your organization's office. Please let us know the address and person to whom the award should be sent.

We again thank you for your participation and your commitment to sustainability.

Sincerely,

A handwritten signature in blue ink that reads "Mikhail Chester".

Mikhail V. Chester, Ph.D.  
Associate Professor of Civil, Environmental, and Sustainable Engineering  
Director, Metis Center of Infrastructure and Sustainable Engineering  
School of Sustainable Engineering and the Built Environment  
Arizona State University
