

## What is ADOT Kids all about?

**A**DOT Kids was created to spark children's curiosity in how things work and what makes things go ... to tap into their interest in science, technology, engineering and math. ADOT Kids has lots of free, downloadable activity sheets, links to videos, and more! Due to the COVID-19 pandemic, Arizona schools closed on March 15, 2020, and Governor Doug Ducey issued a "Stay Home, Stay Healthy, Stay Connected" executive order. With thousands of parents teleworking and homeschooling their children, Arizona Department of Transportation communications team members brainstormed about how ADOT could help educate and entertain children during these unprecedented times.

### ADOT Kids topics include:

- Bridges
- Dust storms
- Freeway design
- Litter
- Safety
- Snowplows in AZ
- Freeway signs
- Engineer-as-a-career
- and coming soon — Bicycle safety!

**T**he ADOT Kids website provides many activities that teachers can use in their classrooms and kids can do on their own! Children can learn more about civil engineering as new activities are rolled out to engage, educate and entertain them, while they learn about Arizona's transportation system.
