Field Review Form
Unsignalized Pedestrian Crossing Locations
Safe Transportation for Every Pedestrian (STEP)

Important: This form is customized for the roadway characteristics of the crossing location. Please make sure that the AZ STEP Guide Output table below matches the lane configuration, Daily Traffic Volume (Vehicle AADT) and posted speed limit of the crossing location being evaluated. If they do not match, please see www.azdot.gov/azstep to print the correct form.

For each countermeasure below, document why it IS or IS NOT appropriate for the crossing being evaluated. Consider lower cost countermeasures first.

- X-walk Visibility * Also Also Also
- Raised X-walk Not Recommended
- Advance Yield Always Always Always Always
- In-Street Ped Sign Not Recommended
- Curb Extension Also Also Also Also
- Refuge Island Not Recommended
- RRFB Always Always Always Always
- Road Diet Not Recommended
- PHB Always Always Always Always

* = Crosswalk visibility enhancements should always occur when any other countermeasure is implemented.
Always = The countermeasure should always be considered, but not mandated or required, based upon engineering judgment at a marked uncontrolled crossing location.
Also = The countermeasure is also a candidate treatment at a marked uncontrolled crossing location.
