

## Aviation, Aerospace, and Defense Support Arizona

Arizona is home to 67 publicly owned, public-use airports that support the economic vitality and quality of life within the Grand Canyon State. Some of the world's most cutting-edge aerospace and defense companies and numerous United States (U.S.) military installations with a significant aviation-related component are also located across the state. The 2021 Arizona Aviation Economic Impact Study (AEIS) commissioned by the Arizona Department of Transportation (ADOT) Aeronautics Group examines the impacts of these three vital aspects of aviation and aerospace in Arizona.

Together these components contribute over \$121.4 billion to our economy every year—providing a foundation for Arizona's culture of growth, innovation, and economic prosperity.

### STATEWIDE ECONOMIC IMPACT

# \$121.4 Billion

Notes and Sources: (1) Impacts modeled by IHS Markit using IMPLAN [2019]. (2) Impacts obtained from the Economic Impacts of Arizona's Principal Military Operations commissioned by the Military Affairs Commission. Prepared by The Maguire Company [2017]. (3) Impacts modeled by IHS Markit using IMPLAN for 59 study airports. Eight airports requested that their independently conducted studies be incorporated into the ADOT AEIS study results [2019]. Please see the AEIS Technical Report for further details.

## Tax Impacts

Airports' direct economic impacts result in local and state tax revenues. On-airport businesses pay business and operating (B&O) taxes. Visitor spending generates taxes and fees associated with sales; hotel stays; and use of transportation services including rental cars, Transportation Network Companies (TNCs), and taxis.

### 2019 Tax Impacts

Airport-specific (SJN)	\$196,000
All Airports in Apache County	\$619,000
<b>Total Statewide Airport Tax Impacts</b>	<b>\$3,472,766,000</b>

Source: IHS Markit using IMPLAN 2019

## ARIZONA AVIATION ECONOMIC IMPACT STUDY

### St. Johns Industrial Air Park St. Johns

## What Does Economic Impact Measure?

The Arizona AEIS measured how economic activity at the state's airports stimulated the Arizona economy in 2019. Impacts are generated by airport administration and business tenant employees working on airport property, capital improvement spending, and the thousands of out-of-state and international visitors who fly to Arizona and bring new money into our economy.

In turn, airport administration and on-airport business tenants purchase goods from suppliers (indirect impacts) and airport workers spend the money they earn (induced impacts), generating successive waves of economic impacts in Arizona.

## Arizona Airports are Vital to the Economy

Arizona's diverse airports support commercial passenger service; world-class general aviation (GA) activities such as flight training, skydiving, and aerial tours; and air cargo while serving as regional job centers and economic engines in their communities.

## Statewide Economic Impact of Arizona Airports\*

Arizona's airports contributed **\$33.0B in value added** to the state, equaling 10.2% of the total Gross State Product in 2019.

*\*This includes the economic impacts of Arizona's airports but excludes aerospace manufacturing and military operations.*

**Jobs**  
386,057

**Earnings**  
\$20.4B

**Economic Activity**  
\$59.4B

## Top Airport Activities at SJN

## Economic Impact of SJN

**\$989,000**

On-airport  
Activities

**\$715,000**

Visitor  
Spending

Indirect/Induced  
**\$1,284,000**

### SJN Total Impacts

**Jobs: 22**  
Number of full- and part-time persons employed

**Earnings: \$969,000**  
Total compensation paid to workers including wages and benefits

**Economic Activity (Output): \$2,988,000**  
Value of sales that occur in the Arizona economy that are ultimately attributable to airport activities

## St. Johns Industrial Air Park (SJN)

St. Johns Industrial Air Park (SJN) is a GA airport in eastern Arizona located one mile north of the city of St. Johns, which owns and operates the airport. The airport has two asphalt runways, the longest of which (14/32) is 5,322 feet long by 75 feet wide and equipped with an instrument approach. SJN is a popular stop for recreational and business GA aircraft traveling across the southern U.S. Many pilots and passengers fuel their aircraft at SJN and frequently use the airport's courtesy car to visit restaurants and businesses in town.

The airport is utilized by the Salt River Project Agricultural Improvement and Power District, which flies dozens of employees to and from the nearby Coronado Generating Station each month. SJN also supports aerial inspections, military training, transient flight training, and law enforcement activities. Firefighting aircraft activities and aerial medical evacuations are also accommodated at the airport, contributing to the overall safety and accessibility of this remote region of eastern Arizona.

### Did You Know?

SJN is located adjacent to the Summit Health Care Family Medicine - St. Johns clinic, enabling patients to be transferred directly from the hospital to aircraft waiting at the airport.
